Record scope and provenance This fictional order export belongs to CASE-1003, order ORD-24003, and the snapshot ending October 17, 2026. The originating team retains ownership of its record. Source timestamps describe recorded events; a later export timestamp does not mean an earlier action was repeated. Historical attachments are retained to explain what the employee could see at each contact. This export is a simulation, contains no real customer information, and is not connected to any institution. ## Item allocation The order amount is the device purchase total, not the sum of purchases elsewhere in the account. The invoice identifies the original payment instrument with a masked suffix and retains the original currency. A later return is linked through the order reference rather than a customer name alone. For this export, the controlling references are case CASE-1003, order ORD-24003, and device DEV-88003. Preserve the source date when forwarding the evidence, and do not replace the recorded status with an employee expectation.

Fulfilment controls The dispatch team records outbound tracking separately from return tracking. The outbound serial is the expected device for intake comparison. Packaging accessories can be listed for shipping completeness without representing separately refundable purchases. For this export, the controlling references are case CASE-1003, order ORD-24003, and device DEV-88003. Preserve the source date when forwarding the evidence, and do not replace the recorded status with an employee expectation.

Financial allocation table The control total equals the components; it is not an additional charge. These lines allocate the amount already recorded above.

Line	Component	Amount USD	Treatment
1	Device allocation A	746.73	Included
2	Device allocation B	746.73	Included
3	Tax allocation	104.54	Included
4	Total for this record	1598.00	Control total; do not sum twice
