Shared bank refund acknowledgement and information request

Customer Case Intelligence | Fictional demonstration

Bank liaison record - CASE-1008

FICTIONAL DEMONSTRATION. This approved support-sharing summary connects the order, return, merchant payment process and bank review. No real customer or institution is represented.

Order: ORD-24008. Bank case: BC-1008. Status: information_required.

Temporary dispute credit does not establish a final merchant refund.

Required information: Final processor reference and bank posting confirmation. Next responsible team: Payments operations. A requested item must be supplied with the case and order references so the receiving team can connect the evidence without asking the customer to repeat the history.

Connection	Verified value	Interpretation
Customer case	CASE-1008	Shared investigation identifier
Order	ORD-24008	Merchant order link
Bank case	BC-1008	Synthetic bank review link
Posted credit cents	0	Support-approved supplied evidence only

Receipt for processing is separate from posting to the customer account. Acceptance of a dispute for review is separate from acceptance of a merchant refund. Temporary dispute credit may be reversed and is never counted as final merchant credit. An absent entry in a supplied statement is not proof that no refund exists in another account or later window.

This record is authored synthetic data. It is not an API response, a payment instruction, or an executed bank action. Human review must verify provider references and account scope before closing a case.
