Refund tracing reference types

Customer Case Intelligence | Fictional demonstration

Curated paraphrase of provider-specific documentation, reviewed 2026-10-17. Supported refund flows may expose an Acquirer Reference Number (ARN), System Trace Audit Number (STAN), or Retrieval Reference Number (RRN) to help trace a refund. Reference availability depends on the network and payment method. A reference does not independently prove a customer's bank posted a credit; this provider's behavior is not universal policy.
